

# Big Data for Managers

**In this two day masterclass "Big Data for Managers" you will learn about the terms, techniques and challenges of an analytics strategy by experienced data science experts and university professors.**

Are you looking to gain a strategic overview of big data and analytics? Wondering if your organisation or your clients are ready to embrace a big data strategy or boost its analytical capabilities? Join our 2-day introduction course for management and executives to discover what you need to help your company or team become more data-driven. Next to the theory and workshop sessions, we offer a chance to share experiences with like-minded professionals who are also ambitious to grow their analytics strategy.

### Faculty & speakers

The lecturers for this masterclass are professors of the University of Amsterdam and experienced consultants of ORTEC.

## Collaboration

This masterclass is organised by The Analytics Academy, which is a collaboration between Amsterdam Data Science, ORTEC and the Amsterdam Business School of the University of Amsterdam. To meet the markets demands for educated data scientists and business analysts these three partners started the academy in 2015. The Analytics Academy is offering end-to-end solutions for data science and business analytics education to commercial, governmental and non-profit organisations, both open enrolment and in-company. The three founding partners of the academy bring a vast experience in data science education, for audiences ranging from senior management to hands-on data scientists in a wide variety of sectors and industries, including transport and logistics, energy, retail, ICT and healthcare.

Besides open programmes, The Analytics Academy develops tailored in-company training programmes on Data Science. With this broad range of Data Science trainings, The Analytics Academy helps organisations to grow and sustain knowledge at each stage of the data driven transformation.

Our training sessions go through all layers of the organisation and range from creating basic understanding at board level in order to develop a data strategy to acquiring hands-on skills enabling your staff to deliver value in data oriented projects. A unique benefit of our partnership for our clients is the ability to combine tailored classroom training with on-the-job coaching leading to better adoption and implementation of the capabilities within the organisation. Previous clients are CPB, De Goudse, Glencore, Havenbedrijf Rotterdam, PostNL, Tata Steel, TomTom and more.

## Contact

If you are interested in what we can do to help your team get data-driven, please contact us via [info@theAnalyticsAcademy.nl](mailto:info@theAnalyticsAcademy.nl) or call Robert Monné +31 (0)6 1529 1311.

### A selection of responses from our participants:

“A great turbo lecture about big data from A to Z. Excellent!”

“Nice to meet other people struggling with this topic.”

“Good overview an in-depth examples from really experienced people.”

“This Big Data course for managers gives you a good overview of everything involved: from vision and change management to techniques, legalisation and attracting and keeping the right talent!”
