

Big Data for Boundary Spanners

A 14 days in-company training program for those with a business background, that want to become more hands-on in Data Science.

Training includes:

Big Data
Strategy

Statistics

Econometrics

Operations
Research

This programme is only offered in-company at the moment which means it can be custom-made. As an indication the investment per participant is around € 13.000 for a 14-day course with a group minimum of 15 and maximum of 20 participants per group, including the use of a Big Data platform.

- ✔ Big Data Project
- ✔ Written exam
- ✔ Official UvA certificate Data Scientist in practice

The best of both worlds

Taught by Amsterdam Business School professors and ORTEC's top Business Analytics consultants, The Analytics Academy covers both theory and practice. Our programs are tailored to your company's specific needs. Course dates, duration and curriculum may vary depending on the entry level of participants.

The Analytics Academy is a cooperation between Amsterdam Business School of the University of Amsterdam, ORTEC and Amsterdam Data Science.
